

America on Trial: Defend the Founding Principles That Built a Nation

““We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.” - The Declaration of Independence”

These words, penned by Thomas Jefferson over two centuries ago, have served as the bedrock of American society. They are a testament to the Founding Fathers' belief in the inherent worth and equality of all individuals, and the idea that government should be limited in scope and power.

Today, these principles are under attack from both the left and the right. Some on the left argue that the Founding Fathers were racist and sexist, and that the Constitution is a flawed document that needs to be rewritten. Some on the right argue that the Founding Fathers were too quick to give up power, and that the federal government needs to be strengthened to protect against threats from both within and outside the country.

In *America on Trial*, historian and constitutional scholar William J. Bennett offers a vigorous defense of the Founding principles. Bennett argues that the Founding Fathers were not perfect, but that their vision of a limited government based on the consent of the governed is still the best way to guarantee individual liberty and prosperity.

Bennett shows how the Founding principles have been eroded over time, and he argues that we must return to these principles if we want to preserve the American way of life. He discusses the importance of free speech, religious freedom, and the right to bear arms, and he shows how these rights are essential for a free and prosperous society.

America on Trial is a timely and important book that will help you understand the challenges facing our nation today. Bennett's thoughtful insights and passionate defense of the Founding principles will inspire you to be a champion of liberty.
