Chapter 1: Disassembly

The first step in restoring your AMC muscle car is to disassemble it. This involves removing all of the body panels, interior components, and mechanical parts. It's important to be careful during disassembly to avoid damaging any of the parts.

Once the car is disassembled, you can begin to clean and inspect the individual parts. This will help you to identify any areas that need repair or replacement.

If you're not experienced in bodywork or painting, it's best to leave these tasks to a professional. However, if you're up for the challenge, there are many resources available to help you learn how to do these jobs yourself.

Chapter 3: Engine and Drivetrain

Once the body and paint are finished, you can begin to work on the engine and drivetrain. This involves rebuilding or replacing the engine, transmission, and differential.

Again, if you're not experienced in engine or drivetrain work, it's best to leave these tasks to a professional. However, if you're up for the challenge,

there are many resources available to help you learn how to do these jobs yourself.

Chapter 4: Reassembly

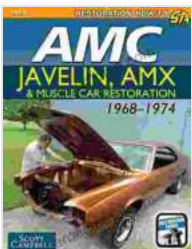

Once the engine and drivetrain are finished, you can begin to reassemble the car. This involves putting all of the body panels, interior components, and mechanical parts back on the car.

It's important to be careful during reassembly to make sure that everything fits together properly. Once the car is reassembled, you can start it up and enjoy the fruits of your labor.
