The M1 Carbine, a lighter and more compact version of the Garand, was issued to paratroopers and other specialized troops. The Thompson submachine gun, with its high rate of fire, was used in close-quarters combat.

Machine Guns

Mortars and Artillery

Mortars and artillery provided the infantry with indirect fire support, allowing them to engage targets beyond the range of their rifles and machine guns. The M1 81mm mortar was a medium-weight mortar that provided close support to infantry units. The M2 105mm howitzer was a light artillery piece that could be towed behind a jeep.

Anti-Tank Weapons
